Coretouch

Software

Empower your institute with best-of-breed cloud based software solutions

An affordable suite of powerful software tools built for educators, students and the education institutes that makes learning immersive and collaborative while transforming your entire campus to be more efficient and effective.

Coretouch

Core Screen

Add an intelligent touch to your classroom

CoreScreen takes virtual classroom or online tutorials to the next level. It allows you to create virtual classrooms using any interactive device as long as you have a browser with internet connectivity. Remote participants can join the live sessions instantly and see in real time what is being written on the whiteboard while listening to the presenter's audio in any device with an internet enabled browser without having to install any software.

Real Time Campus Tracking Solution

Campus Track accurately monitors in real time, the location of students, staff, faculty, visitors and guards in schools, colleges or university campus. Powered by one of the most powerful application software it integrates all the hardware components and provides meaningful output and view to users and management to locate, monitor and track students in real time. Administrators can track anyone in the campus in a GUI or a large digital map.

Campus Track helps provide detailed MIS reports, search to locate students or visitors, manage student attendance, receive notification alerts, ring fence campus as well as departmental view of the college.

Library control

Library Management Solution

Library Central is an application software which combines security with efficient tracking of books and assets throughout the library, including easier and faster charge and discharge, inventorying, and resource handling. It is interoperable and can be integrated with your existing LMS.

Our enterprise grade RFID based solution makes library management very simple, efficient and effective. Locating a book is simplified and students can self check in or check out seamlessly using their ID cards.
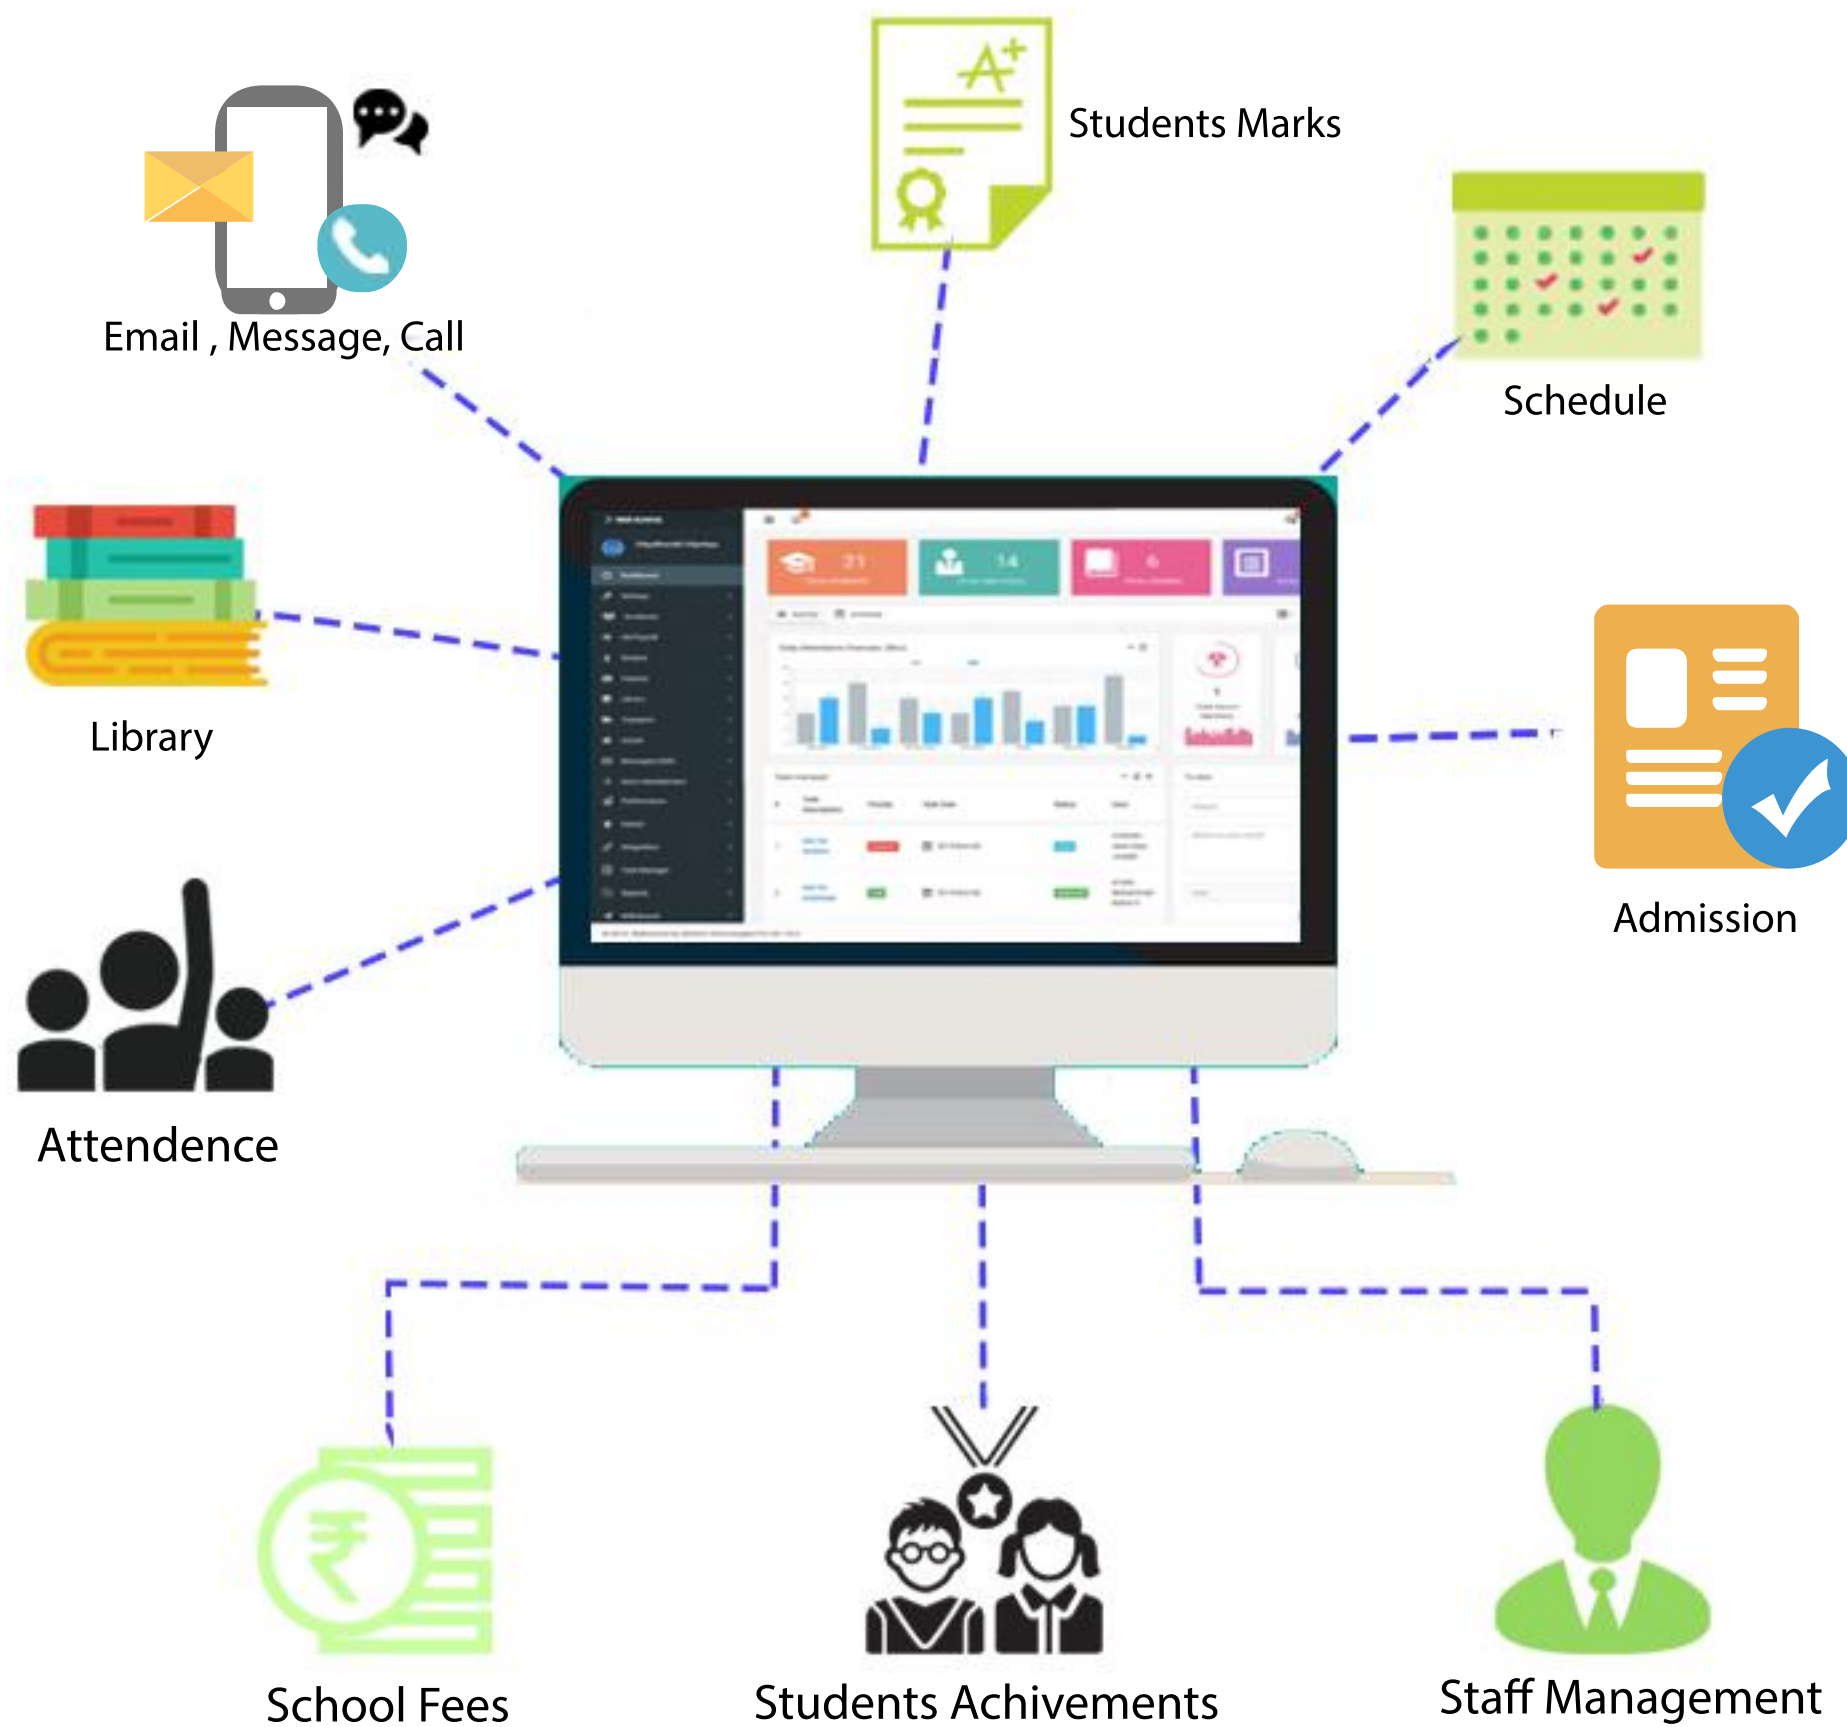

Yellow bus live

Real Time School Bus Tracking Solution

YellowBusLive(YBL)is a mobile application that connects parents with their child school transport system, enabling them to locate their child and school bus at any given moment during their school bus route.
